Summary

- Driving forward software and AI at Ruokaboksi / Yummy, a Finnish meal-kit service
- Took the product from Finland into Estonia, Czechia and Slovakia
- Making AI agents fit into real workflows

I'm CTO at Ruokaboksi, a meal-kit subscription platform delivering easy, healthy and delicious meals weekly to your door. I joined as the first technical hire, moved our engineering in-house from external consultancies, and now lead a team of 4 great engineers alongside sitting on the management team.

Before Ruokaboksi I spent 4 years at Lyyti building B2B event tech, and set up Dataatti Oy to do some work on the side.

Outside my day job I like talking shop and startups. I've spoken at Turku tech meetups about startup CTO life and what it actually means to be a "Product Engineer", and I run our annual company hackathon because good ideas shouldn't only happen in sprint planning. In my free time I cycle here and there, most recently on a Cube gravel bike. I'm also known for my scouting background, where I worked on projects such as a 40-person two-week all-inclusive camp in Italy.

Experience

Ruokaboksi

Chief Technology Officer — Mar 2025 – Present · Turku, Finland

Leading technology and AI at a meal-kit startup that focuses on delivering delicious, healthy, and easy-to-cook weekly meal plans to your doorstep. I drive and commit to the entire development lifecycle, from shaping feature specifications to guiding design, development, testing, and successful releases. I take pride in fostering a collaborative, efficient work environment with a flat hierarchy where every team member thrives. I participate in overall company decision-making and business operations as a member of the management team.

Lead Developer — Mar 2023 – Mar 2025 · Turku, Finland

Dataatti Oy

Founder — Nov 2020 – Present · Turku, Finland

Dataatti offers modern and innovative takes on customer needs. We founded Dataatti with two of my university friends after winning a 10k€ hackathon and ended up doing a few projects for public and private organisations.

P & P Silenius Oy

IT Consultant — Jun 2015 – Present · Salo, Finland

Creating and operating IT systems for a family business as well as assisting in business planning. Developed B2C websites for customer companies to boost their sales.

Lyyti

Senior Frontend Developer Dec 2022 – Mar 2023 · Turku, Finland

Developed a B2B SaaS event management product. The last few years were spent in a big role in the technical rebuilding of the product and constantly onboarding new developers to the team. On top of daily development tasks I improved our engineering practices, organised events and figured out architecture level solutions to bigger features.

Frontend Developer Aug 2020 – Dec 2022 · Turku, Finland

Interim Scrum Master Feb 2022 – Aug 2022 · Turku, Finland

PM Thesis Worker Nov 2020 – Jan 2021 · Turku, Finland

My Master's thesis was an assignment for Lyyti and mainly worked on user research practices to improve product management decisions. During it I created a model for executing and utilising user research in product development projects and documented those processes in practical guides.

Junior Frontend Developer May 2019 – Aug 2020 · Turku, Finland
